The purpose of the crossed-out wheelie bin symbol is to remind us that most electrical product and batteries contain trace elements which could be harmful to our environment and therefore our health. We must all be careful to dispose of them responsibly in a specifically designated way - either using a collection scheme or into the correctly labelled civic amenity (NOT into general waste) - this will help your local authority to arrange to recycle or dispose of them in the appropriate manner.

Walkie talkies have been used for many years. They were first widely used by the military and early models were heavy and bulky. Nowadays they are much smaller and lightweight. Their use spread to the police and fire service and now are used by many people for work or just fun!

Walkie talkies work using radio waves; they are essentially two-way radios. The radios you listen to at home only receive signals, but your walkie talkies receive and send out signals.

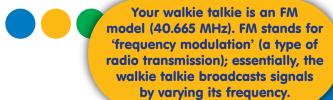

How To Use Your Walkie-talkies

- 1. Insert the battery. (Refer to page 5 for detailed instructions.)
- Roll the ON/OFF/VOLUME CONTROL wheel down to ON (you will hear a click) and the red LED-power bulb will light up on the front panel.
 Roll the wheel down for maximum volume or up to reduce volume.
- 3. Press the PUSH-TO-TALK button to speak, then release to hear a reply.
- 4. When speaking, talk clearly in a normal voice, holding the walkie-talkie about 8cm from your mouth.
- 5. Best transmission is obtained when the antenna is in a vertical position and being used in an open space, away from buildings, pylons or other interference.

••• IMPORTANT! When using your walkie-talkies,

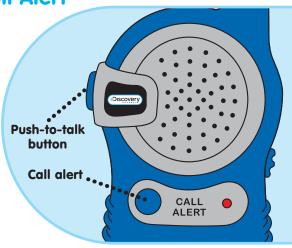

●●● How To Use Your Call Alert

The call alert button sends a ringing sound (like a phone) to the other walkie-talkie. This alerts the recipient that you want to talk.

- Press the PUSH-TO-TALK button and the CALL ALERT button at the same time. The other walkie-talkie will ring (as long as it is switched on!).
- 2. To talk normally, just press the PUSH-TO-TALK button.

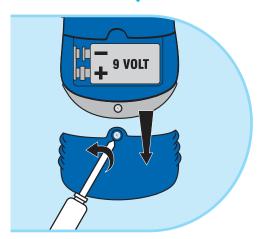

••• IMPORTANT INFORMATION

- Your walkie-talkies may work up to 500 metres apart. However, please
 note that they will work best in an open area. Adverse weather conditions
 can affect the range. These walkie-talkies are not suitable for use inside
 buildings or in built-up areas.
- Avoid getting your walkie-talkies wet, as water and damp can affect or damage the electronics.
- Avoid hitting or dropping your walkie-talkies against a hard surface, as this can dislodge electrical components.
- Your walkie-talkies have been fully adjusted prior to leaving the factory.
 Be sure not to touch the internal components when you are replacing the batteries.
- If the sound becomes weak, try changing the batteries, or check the troubleshooting guide on the opposite page.
- Remember to turn off the ON/OFF/VOLUME CONTROL wheel when not in use.
- Keep or store your walkie-talkies in a dry, clean place.

●●● Troubleshooting Guide

Problem	Solution
Interference or fading message	Move away from any buildings, large structures, street lights or overhead power lines, as these can cause interference.
	Make sure the antenna is pointing up.
	Move closer together; you may be out of range.
No message is being received	Make sure both handsets are switched on and check the volume levels.
	Make sure that the batteries are inserted properly and that they aren't low on power; replace if necessary.
	Check that the person receiving isn't pressing the PUSH-TO-TALK button.
	Make sure that the person sending is pressing the PUSH-TO-TALK button.

●●● Battery Installation – Adults please take note!

- 1. Unscrew the battery cover with a Phillips screwdriver.
- 2. Slide off the battery cover.
- Insert one 9V battery with positive (+) and negative (-) ends facing the directions indicated in the battery compartment.
- 4. Replace cover, ensuring that it is securely tightened.

Always remove all old batteries before replacing with new batteries, and follow instructions above.

4

••• IMPORTANT INFORMATION

Safe Battery Usage

- Only adults should replace batteries.
- Do not mix battery types or old and new batteries.
- Do not use rechargeable batteries.
- Nonrechargeable batteries are not to be recharged.
- Batteries are to be inserted with the correct polarity.
- Do not short-circuit the supply terminals.
- Remove exhausted batteries from the toy.
- When toy is not in use, remove batteries to prevent possible leakage.
- Use only recommended or equivalent battery types.
- Do not dispose of batteries in fire: batteries may explode or leak.

When you speak into a walkie-talkie it converts your voice into a radio signal and transmits it to the receiver on the other walkie-talkie. When the signal is picked up at the other end, the walkie-talkie turns it back into speech so your friend can hear it.

Adventures!

These are great walkie-talkies for outdoor adventures with friends and family. See how far apart you can be and still hear each other. But first do not forget to tell an adult where you are going! Take them when you go camping, on bike rides or long walks.

Radio signals are made up of two kinds of waves: 'sound' waves represent the sounds being sent to the listener and 'frequency' waves travel with these sound waves to carry them to your walkie-talkie.

Play Games With Your Walkie-talkies

HIDE & SEEK

Each player has a walkie-talkie. Take it in turns to hide. The 'seeker' presses the CALL ALERT button. By listening to where the sound is coming from (the 'hiders' unit), the target should be easily located! You can limit the amount of times the call alert can be pressed to make it a more difficult game.

TREASURE HUNT

Ask an adult to hide something for the 'hunter' to find. It should be in an area where you can both see each other, but at a distance apart where you would normally need to shout to talk. The adult calls out clues using the walkie-talkie that guide the 'hunter' to the treasure; 'to the left', 'above your head', 'under the leaves' or 'look behind the tree' etc. Older children can play this without an adult supervising.

PRETEND PLAY

Using just your imagination, it's fun to pretend you are in the jungle or halfway up a mountain! Tell headquarters (HQ) what you are doing and where you are. Where else could you be using your walkie-talkie?

SECRET CODES

Make up secret codes so that only the person on the other walkie-talkie knows what you are talking about! Have fun by changing names and places with your own code words. For example, Mum could be called 'V' or 'target one', Dad could be called 'W' or 'target two' and a neighbour could be called 'X' or 'target three'. As long as both you and your friend understand the rules it will be easy to talk in code. You can also create substitute versions of everyday words. For example, you could substitute the words 'birthday' with OLD, 'present' with DONKEY, and 'party' with DANCE. So, you might say (in code) 'I am going to take the OLD DONKEY to the DANCE!' If only a few people know the substituted words, it can be a good way to keep your communication secret. Do not forget to write your code words down so you do not forget them!
